

List of Educational Programs: Transport/ Logistics/ Car Service

Forms of Training: full-time

#	Set Number	Title of the Educational Program	Main Category	Description	Language of Training: 1	Target Audience: 1	Training period	Cost (inUSD)
1	3.1.01	Auto Electronics and Diagnostics	Professional courses	After completing auto electrician diagnostic courses you will get knowledge about car electronic systems, software for car diagnostics, equipment for diagnostics. You will be able to diagnose the electronic systems of the car and troubleshoot, diagnose and maintain gasoline and diesel engines, diagnose lighting and light signaling systems and repair them, diagnose and repair passive safety systems, ABS, security systems.	Russian, English(accompanied by an Interpreter)	Organizations, /enterprise personnel, youth and adults, teachers, vocational training instructors	From 1 month	310
2	3.1.02	Diagnostics of Electrical Equipment, Overhaul of the WP7-WP12 Engine	Professional courses	During the training, you will get skills and abilities to disassemble and assemble systems and mechanisms of WP7WP12 engines, complex and element-by-element diagnostics, calibration of parameters of WP7, WP12 engines.	Russian, English	Organizations/enterprise personnel, youth and adults, teachers, vocational training instructors	From 3 days	130
3	3.1.03	Electric Vehicles: Motor vehicle construction, Maintenance, Diagnostics basis and Repair	Professional courses	At the end of the training, you will learn constructional features of maintenance operations, diagnostics and work with HV (high voltage) systems of an electric car.	Russian	Organizations /enterprise personnel	From 1 week	200

4	3.1.04	Diagnostics of electronic control systems of gasoline engines	Professional courses	At the end of the training, you will learn the mechanism of the power supply systems M-, ME-, MED-Motronic, their principle of operation; methods of diagnostics of sensors and actuators.	Russian, English	Organization /enterprise personnel, teachers, vocational training instructors	From 1 week	95
5	3.1.05	Diesel Engines Electronic Control Systems Diagnostics	Professional courses	At the end of the training you will learn the structure and operation of the Common Rail power supply system, diagnostics methods for system sensors, actuators, high pressure fuel pumps and injectors.	Russian	Organization /enterprise personnel, teachers, vocational training instructors	From 1 week	95
6	3.1.06	Air Conditioning and Climate Control Systems: Design and Operation	Professional courses	As a result of training, you will learn: purpose, structure and operation of air conditioning systems for cars; diagnostic and maintenance techniques.	Russian	Organization /enterprise personnel, teachers, vocational training instructors	From 1 day	70
7	7.8.01	Automobile courses	Driving courses	Training of drivers of category "B", retraining from category "B" to category "C"	Russian	Youth, adults	From 1 year	235
